Siemens Gamesa secures new order in Japan for 74.8 MW

- The company will supply 22 SWT-3.4-108 for two wind farms in Hokkaido

Siemens Gamesa continues to reinforce its presence in Japan by reaching its first agreement with Tokyu Land Corporation for two projects in Hokkaido, and will supply 22 of its SWT-3.4-108. Both nacelles and hubs will be manufactured in Denmark, while the blades will be produced in China.

The turbines will be delivered in 2018-19 and the first batch has arrived at the port in Hokkaido last April. Siemens Gamesa will also handle the operations and maintenance services at these facilities for the next 20 years.

In words of Álvaro Bilbao, CEO of Siemens Gamesa's APAC Onshore business, "Siemens Gamesa is strongly committed to the Japanese market. We were pioneers in this market and we have established ourselves as the leading supplier thanks to our ability to adapt to our customers' needs".

The contracts were signed in August 2017 and March 2018 and are part of the Order Book announced in the results of Q2 FY2018.

Siemens Gamesa in Japan

Since entering this market in 1999, Siemens Gamesa has installed 188 wind turbines in the country (more than 323 MW). The company is also an active player in the operation and maintenance segment.

In addition to Japan, Siemens Gamesa's footprint in Asia Pacific extends to China, South Korea, Indonesia, the Philippines, Thailand, Vietnam, Australia and New Zealand, where it has already installed more than 6.6 GW.

About Siemens Gamesa Renewable Energy

Siemens Gamesa is a global leader in the wind power industry, with a strong presence in all facets of the wind business: offshore (#1), onshore (#2) and services (#2). In 2017 Siemens Gamesa was the number-one company in the sector, with a 17% share of new capacity installed, according to MAKE Consulting.

Through its advanced digital capabilities, the company offers one of the broadest product portfolios in the industry as well as industry-leading service solutions, helping to make clean energy more affordable and reliable. With 85 GW installed worldwide, Siemens Gamesa manufactures, installs and maintains wind turbines in the onshore and offshore segments. Its order backlog stands at €22 billion. The company is headquartered in Spain and listed on the Spanish stock exchange (traded in the Ibex-35 index).
