

PRESS RELEASE

PowerHub and Isotrol Partner to Offer Consolidated Renewable Energy Tools & Solutions

April 11, 2019 - [PowerHub](#) and [Isotrol](#) are pleased to partner to deliver a unified software solution for renewable energy professionals, whether they work in the field, or in the head office. Through this partnership, renewable energy asset owners and managers can expect a seamless integration between their monitoring and asset management software. Isotrol and PowerHub share a common mentality – they understand projects, not limits, and this partnership is a testament to that.

Isotrol, an international, leading technology and software firm, and PowerHub, an industry-leading financial asset management software company, are working together to create a bespoke, integrated asset intelligence platform seamlessly connecting teams and projects. They believe that best-of-breed companies should work together and collaborate, leveraging their expertise to deliver better value to clients.

“PowerHub is excited to partner with Isotrol, a global leader and industry powerhouse, in order to bring enhanced tools and solutions to the marketplace,” said, Etienne Lecompte, CEO of PowerHub. “PowerHub believes that our collaboration with Isotrol will unlock tremendous value for our customers, enabling them to manage the technical and financial aspects of their projects in one place. This partnership creates a platform for our two companies to do great things together, with our customers’ interests always at the forefront of our plans and initiatives.”

“This partnership is yet another piece that will bring high value-add solutions to our customers in a market segment where it is key to operate with high efficiency. Working with PowerHub will allow Isotrol to manage all project information, whether at the field or management level of our customers’ projects,” said Beltran Calvo, CEO of Isotrol. “Isotrol is very proud, together with PowerHub, to deliver a platform that allows our clients worldwide to get the best from their assets, enhancing their profitability. “

Isotrol and PowerHub help manage a combined 42 gigawatts of PV, biomass, hydroelectric, wind, and solar assets worldwide. Their systems support clean energy assets in 50+ countries worldwide.

About PowerHub

PowerHub is an intelligent asset management platform that combines rigorous design with flexibility and customization. It’s designed by and for renewable energy professionals to meet their needs, region by region, whatever the energy source. By centralizing and digitizing project information and connecting to all systems, PowerHub unlocks efficiencies,

capabilities, and insights for better business growth. For more information on PowerHub, visit their website at: <http://www.powerhub.com>.

About Isotrol

Isotrol is a leading technology company which aims to optimize renewable power plants' efficiency and guarantee their profitability.
